Makinex Jack Hammer Trolley

The Makinex jackhammer trolley is an innovative demolition tool for the fast and easy removal of floor tiles, vinyl and cork from concrete and wooden surfaces. It can also be used to remove residue from tile beds and for breaking rocks, blocks, concrete and sandstone.

The jackhammer trolley quickly removes floor tiles with some customers claiming they can do their demolition job up to 6 times faster than when using a jackhammer alone.

No more struggling or bending trying to handle heavy jackhammers! The Jackhammer Trolley carries most of the weight of the jackhammer while the user positions themselves behind the trolley and pushes it along. The ergonomic design minimises vibration impact on the user and provides safer jackhammer operation by reducing back strain and operator fatigue. The Jackhammer Trolley can be adjusted to 6 different positions, ranging from 20-80 degrees to suit most demolition jobs.
