

NEW FOR HIRE 2014
MASTIC REMOVAL TOOL
When fitted to our STR machine

The Mastic Removal Tool is designed with replaceable blades, which enables users to order a replacement kit and easily change used or worn blades minimizing downtime. Simply loosen two screws and replace.

The Diamabrush™ Mastic Removal Tool is designed to remove stubborn coatings from concrete such as mastic, carpet or tile adhesive, thin-set and thin mil coatings like urethane or paint. No harmful chemicals. This diverse tool, uses diamond coated blades to grind tough coatings away, since dangerous and volatile chemicals are not required. Simply apply water to eliminate dust and to flush debris away.
