

Sound levels

	HTG-460	HTG-550 PLUS	HTG-680SP	IVC-45L
Noise emissions³				
Sound power level measured L_w (dB(A))	91.7	90.7	94.4	84.5
Sound levels⁴				
Sound pressure level at the operators ear, L_p (dB(A))	75.9	76.9	76.7	70.7
Vibration levels⁵				
Handle right, m/s^2	1.5	1.5	1.3	N/A
Handle left, m/s^2	1.4	1.3	1.4	N/A

2 This part is applicable only for productsupplied with embedded connectivity.

3 Noise emission in the environment measured as sound power according to EN 60335-2-72. Expected measurement uncertainty 2,5 dB(A).

4 Sound pressure level according to EN 60335-2-72. Expected measurement uncertainty 4 dB(A).

5 Vibration level according to EN60335-1 and EN 60335-2-72. Reported data for vibration level hasatypical statistical dispersion (standard deviation) of 1 m/s^2 . The vibration values are valid for manual operation.
